1. Agile project management works well with projects that take an iterative approach. What does this mean? Select all that apply. 1 / 1 point

- ☐ The project will take longer to complete
- ☒ Project processes are repeated many times during the life cycle of the project

⓪ Correct

- ☒ Project deliverables improve continuously based on feedback

⓪ Correct

- ☒ The team operates within many short blocks of time

⓪ Correct

2. As a project manager, when can an Agile methodology best support your project? Select all that apply. 1 / 1 point

- ☒ When the project deliverable is not yet clear

⓪ Correct

- ☒ When the project receives feedback from diverse stakeholders, with competing interests

⓪ Correct

- ☒ When the project may need adjustments along the way

⓪ Correct

- ☐ When the project faces constraints, including costs or time

3. As an Agile project manager, you should value individuals and interactions over processes and tools. What does this mean for your team? Select all that apply. 1 / 1 point

- ☒ Work together with your team to help each other achieve the best outcomes possible.

⓪ Correct

- ☒ Have brief conversations rather than long, drawn out email exchanges.

⓪ Correct

- ☐ Forgo using processes and tools in order to speed up the production process.

- ☒ Improve collaboration within the team by *effectively* using processes and tools to drive and facilitate your project.

⓪ Correct

4. How does an Agile team create and maintain the right interpersonal and team dynamics to deliver value for the customers and the business? Select all that apply. 1 / 1 point

- ☐ They do their work during intense periods of high workloads followed by periods of light workload.
- ☐ They do not waste time on face-to-face feedback.
- ☒ They know face-to-face conversations are the most effective way to communicate.

⓪ Correct

- ☒ They build projects around motivated individuals.

⓪ Correct

5. What does VUCA stand for?

1 / 1 point

- ☐ Volatility, upheaval, collaboration, and ambiguity
- ☐ Volume, uncertainty, complexity, and accuracy
- ☐ Veracity, uncertainty, collaboration, and accountability
- ☒ Volatility, uncertainty, complexity, and ambiguity

☒ Correct

6. In the VUCA concept, what does *volatility* refer to? Select all that apply.

1 / 1 point

- ☒ A high likelihood of disruptions in your operations

☒ Correct

- ☐ The high number of interrelated forces that influence a project
- ☐ A lack of predictability
- ☒ The rate of change and churn in a business or situation

☒ Correct

7. In Scrum, what does the Product Backlog refer to?

1 / 1 point

- ☐ Where anything blocking the progress of the project is reported
- ☒ Where all features, tasks, ideas, and deliverables are recorded
- ☐ Where the Product Owner keeps track of completed items
- ☐ Where current progress of user stories is tracked

☒ Correct

8. What innovative practices does the XP methodology use? Select all that apply.

1 / 1 point

- ☒ Pair programming

☒ Correct

- ☐ Big design upfront
- ☐ Solo programming
- ☒ Write tests, not requirements

☒ Correct

9. Retrospectives are a key component of which methodology?

1 / 1 point

- ☐ Kanban
- ☐ XP
- ☐ Lean
- ☒ Scrum

☒ Correct

10. Your team completes work in larger chunks and keeps comprehensive documentation to track handoffs between phases. Which methodology are you using?

1 / 1 point

- ☐ Scrum
- ☒ Waterfall
- ☐ Linear
- ☐ Agile

 Correct
