

Understanding time estimation

Multiple choice exercise

Identify the method

Select the time estimation concept that matches the scenario from your house construction project.

Project scenario

You’re constructing this home during the summer months in Florida, where it rains often during the season. To provide an accurate timeline that details when you’ll complete each phase of work, you decide to allocate several extra days to each of the concrete, framing, and electrical work phases.

Select the concept

- Planning fallacy
- Critical path
- Task buffers
- Project buffer
