

Understanding project life cycles

Categorization exercise

Which is the right project phase?

Categorize each task by dragging it to the appropriate area in the project timeline. Or, use the plus sign to choose a project phase.

You’ve categorized everything.

1. Initiate the project

Identify stakeholders

Define goals

Identify resources

2. Make a plan

Manage budget breakdown

Create list of individual tasks

Create a schedule

3. Execute & complete tasks

Manage project progress

Update team on project status

Respond to changes and make adjustments

4. Close out the project

Confirm project outcome is delivered and complete

Document what worked, what didn't

Confirm stakeholders accept the completed work

Continue
