

Gathering data for a project

Video Introduction: Data-informed decision-making

Identify common types of data

Flashcard exercise

How would you define and visualize the metric?

Each flash card will show a metric. Think about whether the metric measures productivity or quality and how to define it. Then, select **See answer** to see an example and find out if you're right. Be sure to review all seven cards.

Metric

Issue

Description

An **issue** is a quality metric and is known as a real problem that may affect the ability to complete a task.

Hide example

Example

Project management software like Jira and Workfront can generate reports that help project managers track both the number of issues and the team's ability to resolve them quickly.
