

Understanding time estimation

Multiple choice exercise

Identify the method

Select the time estimation concept that matches the scenario from your house construction project.

Project scenario

This is your first project in the state of Florida, and your inexperience results in your not adding enough task buffers for inclement weather. When a tropical storm prevents any construction for several days, you realize you underestimated the time you need to complete the project.

Select the concept

- Planning fallacy
- Backward pass
- Capacity planning
- Effort estimation
