

Understanding time estimation

Multiple choice exercise

Identify the method

Select the time estimation concept that matches the scenario from your house construction project.

Project scenario

To determine the home construction end date, you need to figure out the fewest number of tasks you need to complete to meet your end goal, and how long each task takes. You create a list of milestones you must reach and the mandatory tasks that go along with each milestone.

Select the concept

- Network diagram
- Forward pass
- Capacity planning
- Critical path
