1.   What is a deliverable?   1 / 1 point

   ◯ The team feedback gathered during a project

   ◯ Any communications sent from one party to another during a project

   ⦿ A tangible outcome from a project that provides customer value

   ◯ The tasks produced during a project

      ⊘ Correct
         Deliverables are tangible outcomes from a project. How and when deliverables are
         released may depend on the project management approach.

2.   What is the difference between Agile and Waterfall project management approaches? Select   1 / 1 point
     all that apply.

   ☐ Waterfall is more flexible than Agile, as it accounts for changes in stakeholders' needs as
      the project progresses.
   ☑ Agile is a less linear approach than Waterfall.

      ⊘ Correct
         Agile is a more flexible and less linear approach than Waterfall. In Agile, the team is able
         to move quickly and easily as they change and adapt.

   ☑ Waterfall aims for predictability and tries to avoid change, while Agile embraces the reality
      that the world is uncertain and unpredictable.

      ⊘ Correct
         Waterfall aims for predictability while Agile embraces uncertainty. In Waterfall, there is
         a sequential or linear ordering of phases, while Agile takes an iterative approach.

   ☐ Agile and Waterfall approaches are the same. There are no major differences between the
      two.

3.   When it comes to deliverables, what are the differences between Waterfall and Agile? Select   1 / 1 point
     all that apply.

   ☐ Agile projects have one major release, at the end of the project.

   ☑ Agile project deliverable releases are smaller and more frequent throughout the project.

      ⊘ Correct
         Agile project releases are smaller and more frequent throughout the project. Waterfall
         projects, on the other hand, often release their deliverables at the end of the project.

   ☐ Agile and Waterfall project deliverable releases follow a comparable schedule.

   ☑ Waterfall project deliverable releases are often at the end of the project.

✓ Correct
Waterfall projects often release their deliverables at the end of the project. Agile projects, on the other hand, offer smaller and more frequent releases throughout the project.

4. What are the benefits of Agile projects? Select all that apply.   1 / 1 point

☑ They seek out ways to work more efficiently by streamlining processes without losing value.

✓ Correct
The key to streamlining is to reduce waste. Examples of reducing waste include eliminating unnecessary documentation and product features that customers ultimately aren't interested in. Agile projects also embrace uncertainty and deliver what customers want.

☐ They deliver one product release at the end of the project, which helps save time and energy.

☑ They embrace the reality that the world, markets, and users are uncertain and unpredictable.

✓ Correct
The Agile approach acknowledges and embraces the reality of an uncertain world. Agile projects also deliver what customers want and streamline processes along the way.

☑ They help the customer realize—and receive—the product they really wanted.

✓ Correct
An Agile project helps customers realize—and receive—the product they want. Agile projects also embrace uncertainty and streamline processes along the way.
