Gathering data for a project

Video: Introduction: Data-informed
decision-making

Review: Common types of data

Identify common types of data
Flashcard exercise

How would you define and visualize the metric?

Each flash card will show a metric. Think about whether the metric measures productivity or quality and how to define it. Then, select **See answer** to see an example and find out if you're right. Be sure to review all seven cards.

Prio

Pres

Revi
mak

Metric
Number of changes

Description
Number of changes is a quality metric. Changes show any inconsistencies from the initial requirements of the project.

Hide example

Project requests by other teams

- Marketing
- Human resources
- Operations
- Product

Example
A project manager might use a tool like a change log or a spreadsheet to measure the number of changes from stakeholders and look for areas to improve communication.
